

# ProjectDevelopmentPhase

## Sprint4

TeamID	PNT2022TMID23145
ProjectTitle	PersonalExpenseTracker
Date	9 <sup>th</sup> November 2002

- DisplayAndLogout:

The screenshot shows the Spyder Python IDE with a file explorer on the left displaying a project structure with files like `home.html`, `register.html`, `dashboard.html`, `wallet.html`, `detail.html`, `display.html`, `key.txt`, `db_demo.py`, `app.py`, `api1.py`, `sendmail.py`, `service1.yaml`, and `asst.html`. The main editor displays the `display.py` file with the following code:

```
175
176 @app.route('/display')
177 def display():
178
179     print(session['username'], session['id'])
180     stmt = ibm_db.prepare(conn, "select * from user where id = ?")
181     ibm_db.bind_param(stmt, 1, session['id'])
182     ibm_db.execute(stmt)
183     account = ibm_db.fetch_tuple(stmt)
184     print("accountdisplay", account)
185
186     stmt1 = ibm_db.prepare(conn, "select * from credit where userid = ?")
187     ibm_db.bind_param(stmt1, 1, session['id'])
188     ibm_db.execute(stmt1)
189     acct = ibm_db.fetch_tuple(stmt1)
190     print(acct)
191
192
193     return render_template('display.html', account = account, acct = acct)
194
195 @app.route('/Logout')
196
197 def logout():
198     session.pop('loggedin', None)
199     session.pop('id', None)
200     session.pop('username', None)
201     return render_template('home.html')
202
203
204
205 if __name__ == '__main__':
206     app.run(host='0.0.0.0', debug = True, port = 5000)
```

The right sidebar contains a 'Usage' panel with a message about getting help and a 'Variable explorer' panel showing the current Python environment (Python 3.8.5).
